DINH DUC

SOFTWARE DEVELOPER

+84 779488960 dinhducbkdn2004@gmail.com Portfolio: *https://pf.medicalink.online*

CAREER OBJECTIVE

Final-year IT student seeking a Fresher Software Developer position to apply my technical foundation in a professional environment. I am eager to contribute to building high-quality software solutions while continuously refining my skills, with a long-term goal of becoming a proficient Fullstack Developer.

EDUCATION

Da Nang University of Science and Technology – Major in Information Technology *Sep 2022 - Sep 2026*

Relevant coursework: Software Engineering, Data Structures & Algorithms, Object-Oriented Programming, System Design.

GPA: 3.51/4

EXPERIENCE

Open Web Technology Vietnam *Sep 2025 - Dec 2025*

Position: Frontend Developer (Intern)

- Developed modern, responsive web user interfaces using Angular framework and Material library under the guidance of senior mentors.
- Implemented complex state management logic using NGXS to ensure seamless data flow and application performance.
- Collaborated in a cross-functional team (BA, Backend, QA) to deliver a comprehensive Capstone Project, applying Agile principles with task tracking on GitHub.
- Enhanced self-research capabilities and problem-solving skills through hazznds-on coding and code reviews.

SKILLS

Programming Languages:	JavaScript, TypeScript, Python, HTML, CSS/SCSS.
Frontend:	ReactJS, Angular, Tailwind CSS, Bootstrap, Shadcn UI, Ant Design, Material Angular.
Backend:	NestJS, Redis, RabbitMQ, Prisma, MongoDB, PostgreSQL, Qdrant (Vector DB).
Tools & Platforms:	Git, Github, Docker, Postman, Vite, Trello.
Architecture & Knowledge:	Microservices Architecture, RAG, MVC, RBAC, RESTful APIs.
Languages:	English (Intermediate – reading technical documentation, basic communication).

ACTIVITIES

S-group Organization *Jan 2023 - Jan 2024*

Position: Technical member

- Learned and solved algorithm problems.
- Shared knowledge and experience about technical terms.
- Participated in software projects such as developing landing pages and web applications.

SClub - Danang Soft Skills Club *Sep 2023 - July 2024*

Position: Event Team

- Volunteered in community engagement and cleaning activities at the Blind Association, Lien Chieu District, Da Nang.
- Participated in organizing club events that fostered communication and leadership skills in a youth-driven environment.
- Trained in soft skills such as public speaking, teamwork, and time management through workshops led by experienced speakers.

PROJECTS

MEDICALINK (Live Demo | GitHub Organization) *Nov 2025 - Present*

Role: Fullstack Developer • Team size: 1

Overview: A microservices-based medical platform solving patient routing challenges through a high-performance, AI-powered symptom-matching engine.

- **AI-Powered Patient Routing:** Engineered a Retrieval-Augmented Generation (RAG) system to eliminate AI hallucination, accurately matching patient symptoms strictly to verified internal doctor profiles.
- **Architecture Optimization:** Decoupled heavy AI computation from core booking transactions via an event-driven microservices architecture, ensuring zero bottlenecks during high-traffic periods.
- **Cost & Performance Efficiency:** Minimized data retrieval latency via caching and achieved cost-efficient service isolation through database schema-level separation.
- **Advanced UX & Security:** Delivered highly responsive, role-based portals (Admin, Doctor, Patient) with optimized client-side state management and strict Role-Based Access Control (RBAC).

Technologies: *Python, LangChain, Qdrant, NestJS, RabbitMQ, PostgreSQL, Redis, React, TypeScript, Tailwind CSS, TanStack Query, Docker.*

FACE EMOTION DETECTION SYSTEM (GitHub FE | GitHub BE) *Mar 2025 - May 2025*

Role: Fullstack Developer • Team size: 2

Overview: A full-featured platform that analyzes facial emotions from both static images and real-time webcam input, using AI/ML models.

- Developed FastAPI backend with REST APIs for image/video processing and emotion detection.
- Built a responsive React UI with image upload, webcam capture, and real-time rendering.
- Enabled real-time streaming via Socket.IO with face tracking and emotion smoothing.

Technologies: *FastAPI, React, MongoDB, Socket.IO, Hugging Face Transformers, Firebase, Docker.*

WEBCHAT & VIDEO CALL REALTIME (GitHub FE | GitHub BE) *Sep 2024 - Jan 2025*

Role: Frontend Developer • Team size: 3

Overview: A real-time communication app with peer-to-peer video calls, instant messaging, file sharing, and OAuth integration.

- Built WebRTC-based video calling and real-time chat using PeerJS and Socket.IO.
- Developed a responsive React UI with Ant Design components.
- Integrated Google OAuth and designed REST APIs for user & chat management.
- Supported file uploads using Cloudinary.

Technologies: *React, Node.js, Socket.IO, PeerJS, MongoDB, OAuth, Docker.*

HONORS & AWARDS

Academic Encouragement Scholarship, Da Nang University of Science and Technology. *2024*
