CAREER OBJECTIVE

Aspiring Frontend Developer looking for an internship to build practical experience in creating responsive and user-friendly web applications using React and modern technologies. Motivated to contribute to real-world projects in a collaborative and fast-paced environment.

EDUCATION

Da Nang University of Science and Technology - GPA: 3.39 / 4.0 2022 - Present

SKILLS

Programming Languages:	JavaScript, HTML, CSS/SCSS, Java, Python.
Framework & Libraries:	React JS, Redux, jQuery, Bootstrap, Tailwind CSS, Ant Design, Material UI.
Tools & Platforms:	Git, Github, Docker, Firebase, Vite, Postman, Trello.
Others:	REST API, MVC, Responsive Design, Reading English documentation.

PROJECTS

Face Emotion Detection Website (Live: https://emd.ducbkdn.space)

Mar 17 - Present

Technologies used: React JS, Tailwind CSS, Material UI, Socket.IO, Firebase

Description:

- Built intuitive UI for uploading images and detecting facial expressions.
- Integrated authentication (login, register, password reset) and limited guest mode.
- Stored and visualized detection history using responsive chart components.
- Optimized UI/UX across devices and implemented mobile-first layout.

Web Chat & Video Call Realtime - Connectica (Live: https://ducbkdn.space)

Sep 2024 - Jan 05

Technologies used: ReactJS, Redux, Tailwind CSS, Ant Design, PeerJS/WebRTC, Socket.IO, Docker.

Description:

- Designed responsive UI for chat, group conversations, and video calls.
- Built real-time messaging and notification system using Socket.IO
- Integrated video calling via PeerJS with screen sharing and multi-user support.
- Added user authentication via Google OAuth and OTP login, with friend management.
- Dockerized the app and configured CI/CD pipeline for automated deployment.
